

One Foundation, Three Better Member Moments

Convert our plans into a plan-aware knowledge layer inside SAM — and upgrade how members understand coverage, file a claim, and discover new protection. One backend investment, three experiences improved.

Understand Coverage

TODAY

Plan details live in a legal-jargon PDF. The refreshed portal shows high-level benefits only — no caps, limits, exceptions, or real-world scenarios. Members still can't tell if they're actually covered.

WITH SAM

Members ask plan-specific questions in plain language — including “Am I covered if...” scenarios — and get answers grounded in their exact plan and benefits.

File a Claim

TODAY

No claim form exists. Members email a receipt or upload a screenshot with almost no context. The team often starts with ~20% of what it needs and chases the rest through repeated back-and-forth.

WITH SAM

A guided “Ask SAM” intake reads receipts, asks only the clarifying questions needed, and maps each bill to the member's benefits — assembling a complete claim file. The team starts with ~80%, not 20%.

Discover & Expand

TODAY

Coverage gaps are invisible to members, and there's no natural moment to surface new protection such as travel insurance.

WITH SAM

The same coverage Q&A becomes an acquisition surface — overlaying travel insurance scenarios and flagging the gaps left by travel credit-card benefits.

How It Works

A plan-aware knowledge layer — built once, reused across coverage Q&A, claims, and acquisition.

SAM — plan-aware Q&A

WHY HALLUCINATION STAYS LOW

- Answers are retrieval-grounded against the wiki — not generated from memory.
- Scoped to each member's actual plan — SAM never reasons over plans they don't hold.

The “Ask SAM” Claim Flow

Seamless and guided — no claim form, far less back-and-forth, faster turnaround.

1

Opens the claims page and taps Ask SAM

Context-aware to the page the member is on — and to whether an open claim already exists.

2

Chooses to start a new claim

Or asks about an existing one. Members can ask anything; SAM keeps the claim on track.

3

Uploads bills and receipts

No form to fill out. SAM simply asks for the documents.

4

SAM reads each receipt

Infers what it's for and asks only the clarifying questions actually needed.

5

Maps each item to the member's benefits

Gathers information to build the claim file — it never adjudicates or makes judgments.

6

Hands the team a complete claim file

Roughly 80% of context captured up front — cutting back-and-forth and case turnaround time.
